## List of Tables

---

1.1	Demographic Structure of Bamanghaty Sub-division	7
1.2	Land Use of Bamanghaty Sub-division.	17
1.3	Rainfall of Bamanghaty Sub-division	17
1.4	The Location Wise Details of Iron Ores Reserve	18
1.5	The Locations Wise Grade and Reserve of Iron Ores	18
2.1.	The Methods followed in the Determination of Various Physical and Chemical Parameters of Groundwater	26
3.1	Interpretations of Vertical Electrical Sounding (Ves) Data	65
3.2	Geomorphic Features With Their Groundwater Potentiality	79
3.3	Image Elements, Physical Characteristics and Area of Different Land Forms in The Study Area	80
3.4	Effect of Influencing Factor, Relative Rates and Score for Each Potential Factor	81
3.5	Ranks Assigned to Different Parameters Used for Overlay	81
3.5a	List of Villages With Moderate to Poor Groundwater Potential Zones in the Study Area	82
3.5b	List of Villages With Good to Very Good Groundwater Potential Zones in The Study Area	83
4.1	Exploratory Drilling of The Study Area	113
4.2	Well Inventory Data of The Study Area	120

4.3	Yield Potential and Depth Persistence of Saturated Fractures In Different Lithological Units of the Study Area	125
5.1	Groundwater Resource Estimation, Draft Estimation and Budgeting of Jamda Block (For The Year 2017)	132
5.2	Groundwater Resource Estimation, Draft Estimation and Budgeting of Tiring Block (For The Year 2017)	134
5.3	Groundwater Resource Estimation, Draft Estimation and Budgeting of Bijatola Block (For The Year 2017)	136
5.4	Groundwater Resource Estimation Draft Estimation and Budgeting of Kusumi Block (For The Year 2017)	139
5.5	Groundwater Resource Estimation Draft Estimation and Budgeting of Rairangpur Block (For The Year 2017)	141
5.6	Groundwater Resource Estimation Draft Estimation and Budgeting of Bisoi Block (For The Year 2017)	143
5.7	Groundwater Resource Estimation Draft Estimation and Budgeting of Bahalda Block (For The Year 2017)	146
5.8	Groundwater Budgeting(bamanghaty Sub-division)	149
5.9	Draft Estimation By Unit Draft Method	150
6.1	Analytical Methods For Physio-chemical Parameters of Groundwater Samples	171
6.2	Chemical Analysis of Groundwater Samples of The Study Area (Pre and Post Monsoon-2017)	172
6.3	Chemical Analysis of Groundwater Samples of the Study Area (Average of Pre and Post Monsoon-2017)	174
6.4.	Agricultural Indices	178

6.5.	Concentration of Fe in Groundwater of the study area	178
7.1	Vertical Variations In Groundwater Quality of the Study Area	206
7.2	Standards for Drinking Water	207
7.3	Comparisons of Drinking Water Standards (ISI, 1983) With the Various Water Quality Parameters of Waters of the Study Area	208
7.4	Chemical Quality of Groundwater for Irrigational use	209
7.5	Langelier Coefficients	214
7.6	Langelier Index of Groundwaters of the Study Area	216
7.7	Drastic Chart For The Mining Area of Garumahisani & Badampahar	219
7.8	Parameters of DRASTIC Model	219
7.9	Ranges and ratings of the depth of groundwater	220
7.10	Ranges the ranked of net recharge	220
7.11	Ranges and ratings of Topography	220
7.12	Ranges and ratings of Hydraulic conductivity	221
7.13	Ranges and ratings of Aquifer media	221
7.14	Ranges and ratings of unsaturated zone	221
7.15	Ranges and ratings of Soil media	222
8.1	Location of Proposed Artificial Recharge Structures	244

4.2	Geology of The Study Area	85
4.3	Subsurface Geology	95
4.4	Hydrogeological Units	97
4.5	Aquifer Systems	99
4.6	Well Yields	102
4.7	Well Inventory	103
4.8	Water Table Contour Map	108
<b>5.</b>	<b>GROUNDWATER RESOURCE EVALUATION</b>	<b>126</b>
5.1	Introduction	126
5.2	Groundwater Resource Estimation and Budgeting	127
5.3	Groundwater Draft Estimation	128
5.4	Groundwater Balance and Stage of Development	129
5.5	Prospects for Groundwater Development	130
<b>6.</b>	<b>ROGEOCHMISTRY</b>	<b>151</b>
6.1	Introduction	151
6.2.	Water Sampling	152
6.3	Analytical Methodology	153
6.4	Data Presentation	153
6.5	Chemically Related Properties	154

<b>7. HYDROGEOCHEMICAL EVALUATION</b>	<b>180</b>
7.1 Introduction	180
7.2 Genesis of Water Chemistry	180
7.3 Effects of Silicate-mineral Weathering on Water Chemistry	184
7.4 Vertical Variation in Water Quality	185
7.5 Seasonal Variation in Water Quality	186
7.6 Quality Criteria for Domestic Use	186
7.7 Quality Criteria for Irrigational Use	189
7.8 Quality Criteria for Industrial Use	195
7.9 Hydrogeochemical Facies	198
7.10 Vulnerability Assessments Using Drastic Method	200
7.11 Weightage	203
7.12 Range of Parameters	204
7.13 Rating	204
<b>8. GROUNDWATER MANAGEMENT</b>	<b>223</b>
8.1 Introduction	223
8.2 Groundwater Resource Location	227
8.3 Groundwater Resource Development	228
8.4 Groundwater Management Strategies	230
8.6 Groundwater Resource Protection	242
8.7 Conclusion	243
<b>9. SUMMARY &amp; CONCLUSIONS</b>	<b>246</b>
Index	259

### ABOUT THE BOOK

Groundwater is one of the most precious natural resources which support the growth of civilization on the world. The utilization of ground water for domestic and irrigation is as old as the humanity. Proper planning for the development and management of ground water resources require systematic hydro-geological investigation. This book is a comprehensive, self-sufficient and up-to-date document providing detail information on various aspect of ground water exploration, quantitative and qualitative assessment, development utilization and sustainable management using Geospatial approach for investigation and management of groundwater in hard rock terrain. This book will prove eminently suitable for the hydro-geologist, geologist, water planner, students of under graduate, post graduate, research scholar and professional associated with groundwater evaluation, development and management.

### ABOUT THE AUTHORS

**Dr. Debabrata Nandi**, is currently working as Assistant Professor in the P. G. Department of Remote Sensing & GIS at North Orissa University, Baripada, Odisha. He received his M.Sc. and Ph.D. degree from North Orissa University Baripada. He has 10 years of teaching and research experience in different aspects of Remote Sensing & GIS field. He has published 35 research papers in national and international journals of repute in the area of geosciences. He also published a text book as per CBCS syllabus "Remote sensing & Cartography".

**Dr. Pramod Chandra Sahu**, is currently working as Reader in Geology and Head, P.G. Department of Geology at MPC Autonomous College, Baripada, Odisha. He received his M.Sc. and Ph.D. degree from IIT-Bombay and Sambalpur University respectively. He has 27 years of teaching and research experience in different aspects of Geology. He has published two books and 35 research papers in national and international journals of repute in the area of geosciences. One student awarded with Ph.D. degree under his guidance and three students are currently working under his able guidance for Ph.D. degree. He has successfully completed two research projects as Principal Investigator, funded by UGC.

**Prof. Shreerup Goswami**, is currently working as Professor of Geology, Department of Earth Sciences, Sambalpur University. Prof. Goswami has research experience of over 20 years and post graduate teaching experience of 15 years. He has successfully undertaken 5 major research projects supported by the national agencies. He has published 157 research papers in leading international and national journals. He is also author of three text books and two reference books. Fourteen (14) research scholars have been awarded Ph.D. under his guidance. He has received Young Scientist Award for the year 2008 and Pathani Samanta Chandra Sekhar Award for the area 2011 by Odisha Bigyan Academy, Government of Odisha.
