Description

Contemporary Medical Biotechnology Research for Human Health discusses a range of currently available solutions required to defeat the ever-increasing human health challenges. The junction between biotechnology and biomedical/health sciences has led to several improvements in patients' treatment, diagnosis and well-being. The book discusses vital topics ranging from biofilms and UTI, mycobacterial infections, diabetes, aplastic anemia, oral cancer, and possible applications of nanoparticles. In addition, it discusses computer-aided drug design using natural products and new technologies to develop antibiotics. This is a valuable resource for biotechnology and biomedical researchers, bioinformaticians and members of health sciences interested in understanding recent technological developments.

Contributors

Preface

Chapter 1 Human granulocyte proteins constitute the major antimycobactericidal proteins and enhance the killing of mycobacteria within macrophages

Abstract

1.1 Introduction

1.2 Materials and methods

1.3 Results

1.4 Discussion

Acknowledgments

References

Chapter 2 Prevalence of PDR bacterial strains harbored with blaNDM-1 gene isolated from UTI patients

Abstract

2.1 Introduction

2.2 Materials and methods

2.3 Results and discussion

2.4 Conclusion

Ethical approval

Acknowledgment

References

Chapter 3 Biofilm formation and antibiotic susceptibility profile among bacterial strains detected in urinary tract infected patient

Abstract

3.1 Introduction

3.2 Materials and methods

3.3 Results and discussion

3.4 Conclusion

Ethical approval

Conflict of interest

Acknowledgment

References

Chapter 4 A brief study of genes vital for diabetes and their relationship

Abstract

4.1 Introduction

4.2 Objectives

4.3 Materials and methods

4.4 Results and discussion

4.5 Conclusion

Acknowledgments

References

Chapter 5 Vascular endothelial growth factor: An attractive candidate susceptibility gene for diabetic complications in type 2 diabetes mellitus patients

Abstract

5.1 Introduction

5.2 Objective

5.3 Methodology

5.4 Results

5.5 Discussion

5.6 Conclusion

Ethical approval

Funding

Conflict of interest

Acknowledgment

References

Chapter 6 Analyzing the relation between cytokine IL-2 and cytogenetic abnormalities in acquired aplastic anemia patients

Abstract

6.1 Introduction

6.2 Material and methods

6.3 Results and discussion

6.4 Conclusion

Disclosure

Acknowledgments

References

Chapter 7 A comparative study of arsenic exposure in human papilloma virus infection and oral squamous cell carcinoma—An alarming interpretation

Abstract

7.1 Introduction

7.2 Objective

7.3 Materials and methods

7.4 Results

7.5 Discussion

7.6 Conclusion

Acknowledgments

References

Chapter 8 Correlation between oral cancer and betel quid: A molecular cytogenetics study

Abstract

8.1 Introduction

8.2 Materials and methods

8.3 Results and discussions

8.4 Conclusion

References

Chapter 9 Trolox assisted inhibition of glutamate excitotoxicity-mediated degeneration in retina

Abstract

9.1 Introduction

9.2 Materials and method

9.3 Results and discussion

9.4 Conclusion

Conflict of interest

References

Chapter 10 Therapeutic and modulation properties of cross-talking (iso) flavonoids

Abstract

10.1 Introduction

10.2 Computational details

10.3 Results and discussion

10.4 Conclusion

Acknowledgment

References

Chapter 11 Efficacy of green synthesized silver nanoparticles (AgNP) over crude plant extract of Allium cepa and standard antibiotic against bacterial biofilms

Abstract

11.1 Introduction

11.2 Materials and methods

11.3 Results and discussions

11.4 Conclusion

References

Chapter 12 Effectiveness of onion (Allium cepa L.) skin in human health

Abstract

12.1 Introduction

12.2 Materials and methods

12.3 Results and discussion

12.4 Conclusion

References

Chapter 13 Application of random forest in detection of Parkinson's disease

Abstract

13.1 Introduction

13.2 Proposed method

13.3 Experimental setup

13.4 Data description

13.5 Results and discussion

13.6 Conclusion

References

Chapter 14 Computer-aided drug design of lead compounds against dopamine and metabotropic glutamate receptors (metabotropic glutamate receptors 1)

Abstract

14.1 Introduction

14.2 Aims and Objectives

14.3 Methodology

14.4 Results and discussion

14.5 Discussion

14.6 Conclusion

References

Chapter 15 Brain tissue segmentation using modified fuzzy C-means clustering

Abstract

15.1 Introduction

15.2 Preliminaries

15.3 Proposed methodology—MFCM (modified fuzzy C-means algorithm)

15.4 Experimental results and discussion

15.5 Conclusion

References

Chapter 16 Tumor detection using spatial hybrid clustering (SHCM) from brain MRI scans

Abstract

16.1 Introduction

16.2 Preliminaries

16.3 Proposed methodology

16.4 Experimental results and discussion

16.5 Conclusion

References

Chapter 17 Identification of potential drug targets by detangling protein–protein interaction network

Abstract

17.1 Introduction

17.2 Related terminologies

17.3 Dataset

17.4 Methodology

17.5 Results and discussions

Funding

Acknowledgments

References

Chapter 18 **Molecular docking studies between components of eucalyptus essential oil and hom**ologically modeled target protein

Abstract

18.1 Introduction

18.2 Materials, methods, and softwares

18.3 Results and discussion

Acknowledgment

References

Chapter 19 Cryopreservation of mesenchymal stem cells (MSCs) derived from bone marrow with carbohydrate additive sucrose and dimethyl sulfoxide (DMSO)

Abstract

19.1 Introduction

19.2 Materials and methods

19.3 Results

19.4 Discussion

19.5 Conclusion

Acknowledgments

References

Chapter 20 Behavioral difference of interactions between photosensitizer MC 540 and serum albumins in anionic AOT and cationic CTAB reverse micelles

Abstract

20.1 Introduction

20.2 Material and methods

20.3 Results and discussion

20.4 Conclusion

Acknowledgments

References

Chapter 21 Mobile health monitoring for senior citizens using femtolet-based fog network

Abstract

21.1 Introduction

21.2 Proposed M-health monitoring model

21.3 Latency and power consumption in m-HF2N

21.4 Performance analysis of m-HF2N

21.5 Conclusion

References

Chapter 22 Analytical study on variation of healthcare status in Haldia city of West Bengal, India

Abstract

22.1 Introduction

22.2 Methods

22.3 Results and discussion

22.4 Conclusions

Acknowledgments

References
