From the Publisher

Water is life's matter and matrix, mother and medium. There is no life without water."

- Albert Szent-Gyorgyi.

Water and Industry are two important aspect of human civilization. Water is the beautiful gift of Nature whereas Industry reflect the technological advancement to meet our various need. They complement as well as contradict. Industry need Water for its operational purpose but at the same time it disturb the natural balance of water and then we labelled that water as polluted water, with the help of certain approved meters.

In this book we have given a beautiful fact based compilation to show that, how various sources of water being
