Book Description Taschenbuch. Condition: Neu. nach der Bestellung gedruckt Neuware -Multivariate Data Analysis through Cases is vitally important to almost for both academic and applied researchers. The increasing pace of research world in the present situation has its wake highlighted a number of research problems of all broad to specific areas. Among them the problem related multivariate data analysis one of the most significant areas which require efficient multivariate models for efficient researchers. Each research study results of a realistic problem supported by literature and data such that its objectives are optimized and further make recommendations for implementation. Multivariate Data Analysis through Cases is designed to share the stimulating, challenging, fascinating, and sometimes frustrating world of research supported managerial decision-making with fresh researchers preparing to be true researchers or future managers. The book is designed as a text for Post Graduate students, M. Phil and Ph. D. scholars pursuing courses in Statistics, Management, Commerce and Social Sciences. It is also suitable for all those studying for professional qualifications such as IMBA, MBA and MFC. 140 pp. Englisch. Seller Inventory # 9783330064645
