15. A Brief Abstract of your Research Work (Within 200 words):

The intended doctoral research proposal will deal with the investigation of megafossils of different Gondwana formations of major parts of Talcher Basin. A new attempt will be made towards the study of palaeofire and fossil charcoal, regulating the plant biomes of Eastern coastal area. Fossils will be searched from different fossiliferous horizons in Madhupur, Handapa and different collieries of the Talcher Basin. The Permo- Triassic vegetational scenario with landscape of desired realm, reflecting its palaeo-ecology will be reconstructed. A new venture will be sketched to give a geospatial representation of paleobiodiversity of the preferred basin. The study of palaeofire and biogeochemistry will be taken into account for perceiving the palaeoclimatic condition of the basin.
